

DURO 3.0_Co-Extruded

TECHNICAL DATASHEET

DURO 3.0 is the highest quality composite material developed by iDecking Revoluon (IDPC) “Idecking plasc composite controlled formula”.

An ultra-protective capsule surrounds the board, while the natural part, includes a mix of P. Wood, virgin polymers and additives. All this is possible, thanks to our innovave coextrusion process technology.

The surface of Duro 3.0 looks like real wood, in fact it has raised veins that give the magical sensation of a brushed natural wood board. It is a 100% recyclable material and extremely easy to clean thanks to a completely water/oil repellent surface, it maintains its color over the years, guaranteeing an imperceptible fading gradient.

DURO 3.0 decking can be installed on both the **EasyClick** and **EasyChange** systems and is available in various colors.

COMPOSITION

55% P. Wood	35% Vergin Polymer	10% Addittives
